

Sympodium™ interactive pen display

The perfect presentation tool

An effective presentation is more than just words spoken. A strong message is based on both verbal and nonverbal messages. That's why the Sympodium™ interactive pen display is the ideal tool for you to maximize your presentation. You can engage your audience, increase interactivity and impress even the most techno-savvy veterans in the room.

All you need to do is touch the screen with the pen to control computer applications or write in digital ink, while your audience sees the same image projected on a large screen.

Just write

Operating the Sympodium interactive pen display is easy. Just connect the display to your computer and a projector, and you're set. You can launch and control applications, open files and write with digital ink over material including PowerPoint® slides, websites and moving videos, all while your audience sees the same image projected on a large screen.

Stand and deliver

With the Sympodium interactive pen display, you don't have to move from computer to projector, creating distractions and wasting valuable time. Whether you are collaborating on a project or making a presentation, you are the one who controls the pace and flow, making the presentation an active, dynamic process.

If you are collaborating with a few colleagues, you can work from where you're sitting. If you are presenting in a larger setting, the Sympodium interactive pen display allows you to comfortably interact with your material without losing eye contact with your audience. When finished, save your notes into one convenient file that can then be distributed in several formats.

"Prior to owning our Sympodium interactive pen display, we had to hold our quarterly meetings off-site or rent equipment for presentations and audio. Now, our Sympodium product allows us to provide top quality presentations to our staff and clients, and will pay for itself in no time."

Jay M. Copenhaver, chief information officer and assistant vice president, GAI Consultants, Inc., Homestead, Pennsylvania

Features

- 1** On-screen buttons **2** Pen-tool buttons
(left mouse button, ink color, eraser)
- 3** USB hub **4** Function buttons (On-Screen
Keyboard, right mouse button, capture, floating
pen tools, Notebook™ software) **5** USB hub

Key features

The ID350 is perfect for situations that require versatile features in a compact package.

The ID370 is ideal when visibility and clarity are critical, especially when displaying highly detailed material.

- **Interactive screen** – Control your computer with the pen tool. Write over any application. The pen tool is the point of contact on the screen, so you don't have to worry if you brush the screen with your palm or sleeve. Each screen display is designed with sharp corners, straight sides and a flat bezel, so there is nothing to impede your natural writing flow.
- **Save function** – Capture your work in Notebook software or save notes directly into several software applications, including Windows® versions of Microsoft® PowerPoint, Word and Excel®, or into AutoCAD® software.
- **Battery-free tethered pen** – Write smoothly and comfortably with the securely attached pen. Because the pen is battery-free, there's no maintenance cost or downtime searching for replacement batteries.
- **Pen-tool buttons** – Change ink color, or use the eraser without crowding your display with toolbars.
- **Function buttons** – Quickly access the right mouse button, On-Screen Keyboard, Screen Capture tool, Floating Tools toolbar and Notebook software.
- **On-screen display buttons** – Fine-tune display properties to suit your preferences.
- **Adjustable tilt stand** – Move the console to a comfortable viewing angle.
- **VESA mounting plate** – Integrate the Symposium ID350 and ID370 interactive pen displays with any standard VESA mounting arm (75 mm for the ID350 and 100 mm for the ID370).
- **USB connection** – Easily connect the ID350 or ID370 to your computer.
- **USB hub** – Enhance your presentation by connecting a memory key, document camera or other peripherals to the two 2.0 high-speed ports.
- **RGB video pass-through** – Enhance your presentation by connecting a wireless microphone, document or other peripherals using the two ports in the USB hub.
- **Warranty** – Two-year limited warranty.

Dimensions ID350

Active screen area

15" (38.1 cm) diagonal

Size

13 1/2" W x 1 7/8" D x 11 3/4" H
(34.3 cm x 4.8 cm x 29.9 cm)

Weight

SMART Board software

Ever wonder what makes SMART Board™ interactive whiteboards so powerful? Meet SMART Board software – the real genius behind the world's number one interactive whiteboard.

Notebook software

- Create, manage and save materials into a single, presentation-ready file. Export files to clients and colleagues. Integrate digital content, such as Adobe® Flash® files and audio and visual components into presentations. Arrange pages using the Page Sorter. Use Dual Page Display to view two pages simultaneously. You can draw, take notes, and attach files or link to objects and websites on either page.

Ink Aware

- Use a pen from the pen tray or a Pen button to write into Ink Aware applications, such as Microsoft Excel, PowerPoint slides, Word files and AutoCAD®, and save notes directly into these files.

SMART Board Tools

- Type with the On-Screen Keyboard, make a video file with the SMART Recorder, write over video using the SMART Video Player, and focus and prioritize concepts with the Screen Shade and Spotlight.

LinQ™ software

- Connect quickly between devices using a wired or wireless network. Use a laptop to share files and control applications on the interactive whiteboard (and vice versa).

Software system requirements

- Supports Windows, Mac OS and Linux® operating systems.
